1. Art Unit: 3737

2. Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-23, 48 drawn to cableless and acoustically isolated ultrasound transducing assembly, classified in class 310, subclass 314
- II. Claims 24-47, drawn to Acoustic transducing system method, classified in class 600, subclass 443.

3. The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the system apparatus may be used in conjunction with an attenuative backing to reduce internal acoustic reflections..

4. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

5. Claim 1 for example is considered to be generic regarding species set forth in Figs. 2, 4 and 6 - 10 per specification distinction page 10. Applicant is required under 35 U.S.C. 121 to elect a single disclosed species, even though this requirement is traversed.

Should applicant traverse on the ground that the species are not patentably distinct, applicant should submit evidence or identify such evidence now of record showing the species to be indistinct.
